

A Trusted Care Partner

Rosemark at Mayfair Park is different from other area assisted living and memory support communities because we've invested in better clinical staffing, training, equipment, technologies and have secured highly regarded strategic partners. All this equates to excellent clinical capabilities in the care and service to older adults.

Better Clinical Staffing

A wellness nurse is on site 16 hours a day, 7 days a week. In addition, our health and wellness director or nurse manager is also available 24/7. With more nursing coverage, we can accommodate a higher acuity of resident needs including diabetic and insulin management. Our staffing is based on the personal needs of our residents. We increase our care partners as resident needs increase, not based on ratios or resident numbers.

Advanced Communications and Technologies

More effective communication with residents' physicians and overall better care result from our superior technologies:

- Centralized electronic medical records for each resident that are immediately charted by team members through touchpad devices, leading to better access to critical health information and faster decision making
- QuietCare, an unobtrusive, dignified wellness monitoring system from GE and Intel that flags unusual changes in routine early, alerting staff to potential problems
- Wander management system that assures maximum freedom for each resident
- Emergency nurse call system
- Integrative lab results
- Innovative approaches, such as aroma therapy and music, are fully integrated into our care practices
- Decentralized care allows for medications to be secured in individual apartments, leading to fewer errors and more staff-resident interaction

Responsive to Residents

Everyone – from our care partners and nurses to our cooks and housekeepers – is trained to understand the unique needs of older adults and those with dementia/Alzheimer's. We embrace individuality and are committed to helping residents on their journeys.

A Full Complement of Care Partners

Our local partners bring excellent clinical support to each resident:

- Physician House Calls – an in-house physician who can meet with residents in the privacy and comfort of their own homes
- Regular in-house visits by an audiologist, podiatrist and ophthalmologist, with timely appointments arranged by staff
- Local doctors can reserve our physician clinic space to care for residents
- Pharmcare – Local pharmacy for quick delivery
- Infinity Rehab – On-site Part B therapy and state-of-the-art equipment
- Dispatch Health – Mobile emergency response services, which handle some situations in the convenience of residents' Rosemark homes instead of in the emergency room

A Leader in Dementia Care

With a wellness nurse 16 hours a day every day, two rounding physicians and on-site rehabilitation services, Rosemark at Mayfair Park is quickly becoming the go-to community for those with Alzheimer's and dementia. As a brand new community, we currently have private apartments available for immediate move in.

Never Stop Blooming at Rosemark

Our beautiful all-new community delivers peace of mind for families and joyful living for older adults. Our residents flourish with the help of nurturing, relationship-based care partners and stimulating daily LEAF (live, enrich, aspire, flourish) programming.
